

Children Electric Car

- Children electric car
- Installation and Operation Instructions
- Stimulation car model
- System driven by remote control
- Forward, backward and steering operations by remote control
- Forward and backward operations by manual shift
- Steering wheel's music function
- Techniques of volume regulation and MP3's amplification function
- Battery power display

WARNING: The toy is to be assembled by an adult.
In unassembled state contain potentially hazardous sharp points, sharp edges and small part, so please keep out of baby's reach

Warning : Not to be used in traffic.

Parts List:(Name and Quantity)

Name	A	B	C	D	E	F	G	H	I	J
Big body	1	1	1	2	1	2	2	1	2	2
Front axle assembly										
Shaft as-rear										
Electric machinery										
Front bumper										
Door trim										
Car door										
Windshields										
Rearview mirror										
Front wheel eyebrow										
Rear wheel eyebrow										
Lamp holder										
Chair										
Lamp holder clip										
Rear lights										
Motor shaft sleeve										
wheel										
Steering wheel										
Remote control										
Wheel cover										
Charger										
Tool bag										

Product Specifications:

Battery	12v7ah * 1
Fuse	15A
Motor	12V * 2
Applicable age	3-7 years old
Maximum load	30kg
Charging time	8-12 hours
Charger	12v1000ma
Speed	3-6km / h

The above parameters are selected by the customer, and the specific parameters shall be subject to the actual sample.

Function

Function indication	
① Music player	⑤ TF Interface
② Electric quantity	⑥ Light switch
③ MP3 Interface	⑦ One click Start
④ USB Interface	⑧ Gear lever

Remote Control Function and Instructions

- Never switch forward and backward operations in the moving, or the gear box and motor will be damaged
- Use the remote control with battery
- Only the baby's legal guardian can use the remote control.
- The product is operated mainly by remote control

Code Method:
Press UP&DOWN Buttons to see that the indicator light is constant on, and turn on the power.

Remote control without battery (to be purchased separately)

Battery Operating Specifications:

- Never mix new and old batteries, or different kinds of batteries.
- Never mistake positive and negative electrode of battery, or short circuit will happen.
- Non-rechargeable batteries are not to be recharged
- Install batteries in a right polarity.
- Only adults can recharge or change batteries.
- Never make power port's short circuit happen.
- Recharge the battery only when it is taken out of the toy car.
- Take exhausted battery out of the toy car and keep it out of Children's reach.
- Remove battery screws with a screwdriver, open battery cap as the arrow signals, and in the 2.4G remote control model install two AAA 1.5V batteries in a right polarity.

Installation Order Diagram

1. Installing front and rear axle

Turn over the body, first rotate the fixed iron sheet to the hole position of the body, and fix it with screw; align the hole position of the steering axle on the front axle bracket to the steering axle, and fix the front axle bracket with screw, align the front bumper with the bayonet on the body and clip it in

2. Install tire assembly

Insert the gasket, bushing, front wheel and gasket into the front axle in turn and fix them with screws, and clip in the cap. First, install and fix the rear wheel and the motor connecting parts, then put the motor, rear wheel and gasket into the rear axle and fix them with screws, and then clip in the cap

3.Installing wheel cover

Clip the front and rear wheel covers into place over the wheels and secure with screws

4.Installing door

Clip the door trim into the door, remove the screw on the instrument, clip the door iron into the body and fix it with the screw, connect the power wiring terminal, and start the car to check whether the wiring is correct

5. Installing steering wheel

Connect the wiring and firmly clip the steering wheel into the steering shaft

6.Installing rear-view mirror and windscreen

Clip in rear-view mirror windscreen at the position on the body

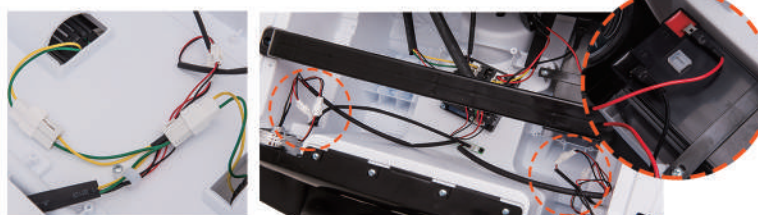

7. Installing rear light holder

First, connect the wiring between the lamp and the lamp holder, clip the lamp holder into the vehicle body, and clip in the lamp holder fastener

7. Connecting wiring

Connect the motor wiring, front lamp wiring and battery wiring

7. Installing seat

Align the seat with the body and fix it with screws

Warnings

Only adults can install parts and adjust the car, and keep moving parts out of children's reach.
Children under 3 years old cannot use the toy car as it has many small parts. Children must take the seat belt when using the car, and keep the car out of the fire.

Children can use the product only in the company of adults, and the adult cannot leave during the process.

Never let Children stand or play onto the pedal or in the car.

Only adults can complete storage battery charging, and must charge the product before its first use.

Keep such package materials as plastic bags out of children, or they will suffocate or kill children.

Never use parts provided by non-manufacturers.

Never let children play with the charger.

Never use the product with over 30-kilogram load.

The product's applicable age range is 3-7 years old.

The number of connected power by the product can never be over the recommended number.

Notice of use:

Never use the product in such dangerous zones as street, road, slope or drain.

Never change the circuit and additional electric devices.

Never use remote control in rainy days or in the water, never pour water or other liquid into the car, keep the product out of the fire, otherwise the car will be damaged.

Only one child can use the product, and its weight cannot exceed 30 kilograms.

Turn off the power when not in use and remove battery connector when not using it for a long time.

As the product has battery charger, check whether wire plug shell and other parts are damaged or not, and fix those damaged parts.

Charging notice:

Charge storage battery less than 8 hours, or the storage battery will be damaged forever.

In charging, put DC Plug into the power socket, put charger into power plug; never use the product during charging it.

The product can be used for one hour, and the charging time is 8-12hours, It is common for charger and storage battery to have not become heated (temperature under 60 degrees) in charging.

Never use the connector with the water, or short circuit will happen.

Use the product's own charger, or cause charger and storage battery to be damaged or short circuit.

Charge the product when not using it for a long time.

Charging steps are as follows:

Step 1 : The charging hole is under the steering wheel.

Step2: Put the charger plug into the plug hole.

Step 3: Connect the charger to the power socket.

Charging protection recommendations (charging below 11V is recommended)

Relevant materials: PP plastics, k-carrageenan, generator, storage battery and iron castings.

Maintenance and Service

Before use children's parents should check whether charge's wiring, plug, shell and other parts are damaged, and fix those damaged parts.

After using the product for a time, parents should lubricate iron castings with lube, or those castings will get rusted; they should keep the product out of fire and lay it flat in dark places; they should put the product inside the house or cover it with one water-proof cloth in wet weather.

Parents should keep the product out of such hot objects as stove and heater, or its plastic parts may be thawed; they should keep the product out of combustible objects in charging, or the fire may happen.

Parents should clean car surface with one dry cloth, or clean plastic parts with non-waxy furniture polish; they shouldn't clean plastic parts with chemical solutions or clean the car with water; children cannot drive the car in wet or rainy weather, or the car's generator, circuit system and battery will be damaged.

when not using or laying the product, parents should cut off car power, keeping all the switches into "STOP" or "OFF" model.

Parents mustn't use the fuse which doesn't conform with the agreed specifications.

Parents should't change product structure and circuit system, and should have the product checked and fixed by professionals or under the guidance of professionals.
